Exercise 1

Activity 01- Structuring an Effective Prompt

Part I: Refine a prompt using common elements.

01

GAIF Activities – Structuring an Effective Prompt

Instructions

Part I: Refine a prompt using common elements.

In this part of the activity you design a prompt by adding elements to the initial prompt related to the task you want the model to perform.

- For each numbered prompt element, copy and paste the example into the Activity 1 Prompt Box and run (play) the app. Review the results in the Response 1 widgets.
- Continue to add each element and run the app after each addition.
- Share your observations
 - How do the model responses differ?
 - How are they the same?
 - How does each additional prompt element change the responses?

Describing the tasks the model should perform

1. Task description:

Activity 1 Prompt Box

Write a blog post about the potential health impacts of plant-based diets.

Response 1 using Amazon Nova Pro

The Potential Health Impacts of Plant-Based Diets

In recent years, plant-based diets have surged in popularity, driven by growing awareness of their potential health benefits, environmental sustainability, and ethical considerations. But what does science say about the health impacts of adopting a plant-based diet? Let's dive into the research and explore the potential advantages—and a few considerations—of making plants the centerpiece of your plate.

What is a Plant-Based Diet?

A plant-based diet emphasizes foods derived

Let's explore what happens when you power up your diet with more plants! Body: SHORT-TERM IMPACTS - KAPOW! • Energy levels can SKYROCKET thanks to complex carbs from whole grains and

How do the model responses differ?

-Part I responses are more organized and focused. The use of tags helps the model understand each element more clearly such as tone, audience, and context giving it a clear and tighter order with the prompt. Part II -without tags, the model might blend roles or miss tone cues, and sometimes go off slightly from the expected output format.

-In Part II, the model leans heavily into the “high-energy TV chef” personality with more lively, expressive language and analogies that fit a cooking show vibe. Part I may be like more worded in the task text, which can lead to a more neutral or generic tone.

-The tagged version is better at generating constraints like “do not mention weight” or “don’t reference teenagers.” In Part I, there's a small chance the model might slip

How are they the same?

-Both versions likely giving the same factual points about plant-based diets, such as improved digestion (short-term) and reduced risk of chronic disease (long-term), due to the model's understanding of health impacts.

-If the instructions in Part I are clear, the model usually follows them well. Both versions would include title, introduction, body, and conclusion.

-Both outputs are likely written in friendly language, especially since the audience (teenagers) is implied in Part I and tagged in Part II.

How does each additional prompt element change the responses?

The tag helps set a clear output, like a high-energy chef, making the writing more engaging. The keeps the message balanced, avoiding extreme views. guide the model to follow a logical structure, and prevent unwanted content like weight discussions. Finally, the ensures the output is well-organized and easy to read. Together, these tags help the model understand exactly what's needed.

Response using Amazon Nova Pro

Hanoi, the capital city of Vietnam, experiences a subtropical climate characterized by distinct seasons. The city enjoys warm temperatures year-round, with variations that create a diverse weather pattern. From May to September, Hanoi enters its monsoon season, bringing abundant rainfall and high humidity. This period is essential for agriculture, as it replenishes water sources and supports rice cultivation. The temperatures during the monsoon season range from 25°C to 35°C (77°F to 95°F).

October to April marks the dry season in Hanoi, with lower humidity and less rainfall. During these months, temperatures

Response using Claude Haiku

Hanoi's Climate: A Seasonal Journey

Nestled in northern Vietnam, Hanoi experiences a fascinating tropical monsoon climate that offers distinct seasonal variations. The city's weather is characterized by warm, humid conditions that create a unique atmospheric experience throughout the year.

Summer in Hanoi, spanning from May to September, brings intense heat and high humidity. Temperatures frequently climb to 35-38°C, making the city feel like a vibrant, steamy landscape. During these months, afternoon rain showers provide temporary relief from the warmth, creating a

Response using Claude Sonnet 3.5

Hanoi's Weather: A Tale of Four Seasons

Located in northern Vietnam, Hanoi experiences a distinct subtropical climate with four seasons throughout the year. The city's weather patterns are influenced by both the monsoon system and its geographical location in the Red River Delta.

Summer, from June to August, brings high temperatures typically ranging between 32-36°C, accompanied by significant humidity levels that can reach up to 80%. These months also receive the highest rainfall, contributing to the city's lush greenery.

The autumn months of September to November

1 You are planning a two-week trip to Vietnam. Follow these steps to develop a suggested itinerary:

2 1. Choose a date based on the most temperate time of year in Vietnam.

3 2. Create a list of sites to visit during the trip.

4 3. Suggest the order in which to visit the sites to keep the travel time between sites as low as possible.

Ask the model to tell you its reasoning. Clear the prompt, then copy and paste the following and run the app:

Activity 2 Prompt Box

You are planning a two-week trip to Vietnam. Follow these steps to develop a suggested itinerary:

1. Choose a date based on the most temperate time of year in Vietnam.
2. Create a list of sites to visit during the trip.
3. Suggest the order in which to visit the sites to keep the travel time between sites as low as possible.

Response using Amazon Nova Pro

Certainly! Here's a suggested itinerary for a two-week trip to Vietnam, taking into consideration the most temperate time of year and an efficient travel plan.

Step 1: Choose a Date

The most temperate time to visit Vietnam is generally from September to November in the north and from March to May in the south. To cover both regions comfortably, let's choose mid-March to early April.

Step 2: Create a List of Sites to Visit

Response using Claude Haiku

I'll help you plan a two-week trip to Vietnam:

1. Best Time to Visit: The most temperate time to visit Vietnam is during the dry season, from November to April. I recommend mid-January to early February, which offers:
 - Mild temperatures (around 70-80°F)
 - Low humidity
 - Minimal rainfall
 - Comfortable conditions for travel throughout the country
2. Sites to Visit:

Response using Claude Sonnet 3.5

Let me help you plan a two-week Vietnam itinerary.

1. Best time to visit: The most temperate time to visit Vietnam is between December and February. During these months, the weather is generally dry and mild throughout the country, with lower humidity levels. Let's plan for January 15-29, which is in the middle of the ideal season.
2. Key sites to visit:
 - Hanoi (Old Quarter, Temple of Literature, Ho Chi Minh Mausoleum)
 - Ha Long Bay (limestone islands, caves)

Instructions

1 You are planning a two-week trip to Vietnam. Follow these steps to develop a suggested itinerary:

2 1. Choose a date based on the most temperate time of year in Vietnam.

3 2. Create a list of sites to visit during the trip.

4 3. Suggest the order in which to visit the sites to keep the travel time between sites as low as possible.

Ask the model to tell you its reasoning. Clear the prompt, then copy and paste the following and run the app:

Tree of thought: Clear the prompt, then copy and paste the following and run the app:

Activity 2 Prompt Box

Think step by step and show your process for arriving at the results. Develop a suggested itinerary for a two week trip to Vietnam.

Response using Amazon Nova Pro

Sure, let's break down a two-week itinerary for a trip to Vietnam. Vietnam is a long, narrow country with diverse landscapes and cultures, so it's important to plan a route that allows you to experience a variety of its offerings. Here's a suggested itinerary:

Week 1: Northern Vietnam

Day 1: Hanoi

- **Morning:** Arrive in Hanoi. Check into your hotel and rest.
- **Afternoon:** Explore the Old Quarter. Visit Hoan Kiem Lake and Ngoc Son Temple.

Response using Claude Haiku

I'll help you develop a two-week itinerary for Vietnam, breaking down the process step by step:

Step 1: Research and Consider Key Destinations

- Vietnam has diverse regions with unique attractions
- Key areas to consider:
 - North: Hanoi, Sapa, Ha Long Bay
 - Central: Hoi An, Hue, Da Nang
 - South: Ho Chi Minh City, Mekong Delta

Step 2: Determine Optimal Travel Route

Most efficient route: North to South (for

Response using Claude Sonnet 3.5

Let me help develop a 2-week Vietnam itinerary step by step.

Step 1: Consider key factors

- Best time to visit: October-April (dry season)
- Must-see destinations
- Travel time between locations
- Logical route direction (North to South or vice versa)

Step 2: Identify major destinations to include

- Hanoi (North)
- Ha Long Bay (North)
- Ho Chi Minh City (South)

Instructions

Ask the model to tell you its reasoning. Clear the prompt, then copy and paste the following and run the app:

1 Think step by step and show your process for arriving at the results. Develop a suggested itinerary for a two-week trip to Vietnam.

Tree of thought: Clear the prompt, then copy and paste the following and run the app:

1 You are planning a two-week trip to Vietnam. Consider three different itineraries based on these themes:

2 For each itinerary: a) List three main activities or attractions. b) Suggest a place to stay that fits the theme.

3 After developing these three itineraries, evaluate the pros and cons of each. Then, based on your analysis, recommend the best itinerary for a first-time visitor to Vietnam explaining your reasoning.

4 Finally, for the chosen itinerary, provide a detailed day-by-day plan for a 14-day trip.

Activity 2 Prompt Box

You are planning a two-week trip to Vietnam. Consider three different itineraries based on these themes: 1)Cultural Experience, 2) Outdoor Adventure, and 3) Foodie Tour.

For each itinerary: a) List three main activities or attractions. b) Suggest a place to stay that fits the theme. c) Recommend a unique dining experience.

After developing these three itineraries, evaluate the pros and cons of each. Then, based on your analysis, recommend the best itinerary for a first-time visitor to Vietnam explaining your reasoning.

Finally, for the chosen itinerary, provide a detailed day-by-day plan for a 14-day trip.

Response using Amazon Nova Pro	Response using Claude Haiku	Response using Claude 3.5 Sonnet (Completed)
Itinerary 1: Cultural Experience a) Main Activities or Attractions: 1. Visit the Imperial City in Hue. 2. Explore the ancient town of Hoi An. 3. Tour the War Remnants Museum in Ho Chi Minh City. b) Place to Stay: • Hue: Stay at La Maison d'Hue, a boutique hotel with traditional Vietnamese architecture. • Hoi An: Choose Blue Bamboo Hoi An, a riverside resort that offers a tranquil stay.	Here are three distinct itineraries for a two-week trip to Vietnam: 1. Cultural Experience Itinerary a) Main Activities/Attractions: • Explore the ancient town of Hoi An • Visit historical sites in Hanoi (Temple of Literature, Ho Chi Minh Mausoleum) • Participate in traditional craft workshops (silk making, lantern crafting) b) Recommended Stay: Boutique heritage hotel in Hoi An's Old Town, such as Anantara Hoi An Resort	Here are three themed itineraries for Vietnam, followed by analysis and a detailed recommendation: 1. CULTURAL EXPERIENCE Activities: • Imperial Citadel and royal tombs in Hue • Traditional water puppet show in Hanoi • Visiting temples and pagodas in Hoi An Accommodation: Anantara Hoi An Resort (traditional Vietnamese architecture) Dining Experience: Royal feast at Ancient Hue Restaurant with traditional court music 2. OUTDOOR ADVENTURE Activities:

How do the model responses differ?

The model gives different kinds of answers depending on how the question is asked. If you give no examples (zero-shot), it gives a simple answer. But if you show examples (few-shot), the model learns the style and gives a more creative or smarter answer. If you ask it to explain its steps (chain of thought), it shows its thinking clearly. And if you ask for different options with pros and cons (tree of thought), it gives a deeper and more thoughtful reply. Also, if you ask it to use tools like real-time weather, and the tools aren't connected, the model admits it can't do that.

How are they the same?

No matter how you ask, the model always tries to follow your instructions and stay on topic. It writes clearly, makes sense, and gives answers that feel smooth and natural. Whether it's a simple task or a detailed one, it tries to do its best to help. The way it explains or presents the answer may change, but the quality and effort to be useful stay the same.
